

Chapter\Author	Jeff	Guerino	Chris	Jason	Jay	Josh	Shuhui	Yan
I INTRODUCTION								
1 General Introduction		x						
2 Ontology and Ontology		x						
3 The Basic Function of Music								
4 Communication								
5 Historicity in Music								
6 Only One Restriction: Quality								
II TECHNOLOGICAL TOOLS								
7 Software Tools and Hardware Options								
8 New Concepts of Musical Instruments								
9 Musical Distribution Channels: New Networks								
10 Big Science in Music								
III MATHEMATICAL CONCEPTS								
11 Mathematical Music Theory		x						
12 Serialism: Failure of New Concepts without Musical Impact								
13 Mazzola's Sonata Construction: A Technical Approach and its Limits								
14 Imaginary Time: Extending Musical Time Concepts to Cognitive Dimensions								
15 Mathematical Gesture Theory		x						
16 Future Theories (Counterpoint etc.)								
IV CULTURAL EXTENSIONS								
17 A Critique of the Western Concept of Music								
18 Improvisation and the Synthesis Project on the Presto Software								
19 Art Beyond Music Alone								
20 What is the Fundamental Role of Music?								
21 Human and Machine Music	x							
22 The Role of Music in the Diversifying Cultures (Africa, East Asia, South Asia)								
23 Cultural Theories of Gesture								
V CREATIVITY STRATEGIES								
24 Recapitulation of Creativity Theory								
25 The Specifically Musical Walls Against Creativity								
26 Examples of Creative Extensions in Music								
27 Performance and Composition								
28 Are Aesthetics and Business Antagonists?								
VI COMMUTE								
29 ComMute—Towards a Computational Musical Theory of Everything		x
